SUMMARY

Remote Front-end developer with a passion for the latest solutions and interactive design, that's why I also do it outside of work. Thanks to the various domains, I enjoyed experiencing numerous tech stacks and work environments. I'm looking for new opportunities to create impactful products.

EMPLOYMENT HISTORY

Front-end Developer at JJM Development, Poznań, Poland
February 2023 — Present

- Worked as a Front-end Developer on a cutting-edge virtual marketplace.
- Collaborated with the business team within a startup environment.
- Prioritized high-quality front-end solutions aligned with the company's vision.
- Took ownership of essential business features and collaborated with the business team.
- Leveraged expertise in React and TypeScript to drive marketplace success.
- Proactively addressed technical debt and improved code quality.
- Embraced an agile mindset to adapt to changing priorities.
- Experienced personal and professional growth as a front-end developer in a startup environment.

Front-end Developer at DreamStorm Studios, Poznań, Poland
October 2021 — December 2022

- Earned promotion from junior to mid-level Front-end Developer, expanding technical expertise and handling significant responsibilities.
- Developed high-quality code for seamless user experiences and optimal performance.
- Gained soft skills and experience as a technical recruiter, enhancing communication and interpersonal abilities.
- Undertook back-end tasks, broadening understanding of development processes and collaborating effectively with back-end developers.
- Contributed to the success of a major platform refactor through team collaboration.
- Actively participated in planning testing strategy and in writing unit and integration tests, ensuring high-quality code and a reliable user experience.
- Introduced and implemented a storybook UI components library, streamlining development and improving UI element consistency.

Freelance Front-end Developer at Netzwind, Poznań, Poland
August 2021 — September 2021

- Played a key role in planning the architecture and implementing the initial version of an information system for students.
- Leveraged expertise in front-end technologies for smooth user experience and feature integration.
- Contributed to a mobile app with over 50,000 downloads by delivering high-quality code and user-friendly features.
- Successfully integrated the front-end with an existing back-end, ensuring efficient data transfer and synchronization.
- Collaborated with product owners to define requirements and translate them into actionable features.
- Maintained a user-centric approach by conducting research, gathering feedback, and implementing iterative improvements for exceptional user experiences.

React Native Developer Intern at Expansio Software House, Poznań, Poland
July 2021 — August 2023

- Contributed to a mobile application for enhancing programming skills through interactive learning experiences as a React Native Developer intern.
- Worked within a collaborative team to build a chat-bot-driven mobile application for immersive learning.
- Gained valuable insights into the end-to-end development process and worked in a dynamic team setting.
- Actively participated in agile development methodologies like Scrum for efficient collaboration and timely project milestones.
- Collaborated with experienced developers, benefiting from their mentorship and learning React Native development best practices.
- Strengthened passion for application development and emphasized the importance of teamwork in achieving project success.

EDUCATION

Engineering's Degree, Collegium Da Vinci, Poznań, Poland
October 2020 — Present

COURSES

CodersCamp, CodersCrerw
November 2020 — April 2021

CodersCamp is a 6-month free web programming course. It was organized by the CodersCrew Association. The course's mission was to guide participants from their first lines of code to kickstarting a career as a web developer
