Hi! I am a remote Frontend developer with a passion for the latest solutions and interactive design, that's why I also do it outside of work. I started my journey with web application programming in 2020. Since then, I have developed quite a few projects. Starting from commercial, through projects for non-government organizations, to personal. Thanks to the variety of domains, I had the great pleasure to experience numerous different tech stacks and work environments. I'm looking for new opportunities to create impactful products.

Skills

Skills

React.js   Next.js   TypeScript   JavaScript ES6   HTML5   CSS3   Sass

Styled Components   Redux   React Query   RTK Query   Astro   Jest

Apollo GraphQL   Storybook   Socket.io   Material UI   Chakra UI   Tailwind CSS

Prettier   ESLint   Yarn   NPM   Node.js   Prisma   NestJS   PostgreSQL

MongoDB

Languages

Polish   native   English   professional proficiency

Work experience

Frontend developer
JJM Development

February 2023 - now

- Developing and sustaining the frontend of a virtual marketplace.
- Collaborating with a scrum team to ensure delivery of high-quality product.
- Introducing and implementing polymorphic approach for building strongly typed components.

Technologies: React.js, Next.js, TypeScript, Jest, Styled Components, Redux, RTK Query, Axios, Sentry, ESLint, Prettier

React developer
DreamStorm Studios

- Developing and sustaining the frontend of an all-in-one platform for creating virtual events.
- Being a member of a team that was planning and executing a major platform refactor.
- Writing unit and integration tests. Taking part in creating a test strategy for the product.
- Introducing and implementing a storybook UI components library in the app.

Technologies: React.js, Next.js, TypeScript, Storybook, Jest, Styled Components, Prisma, Tailwind CSS, Socket.io, ESLint, Prettier

Freelance React Developer
Netzwind

August 2021 - September 2021

- Working on an information system for students and a mobile app with more than 50k downloads.
- Planning the application architecture and implementing the first version.
- Connecting with an existing backend.
- Working closely with the product owner to deliver new features.

Technologies: React.js, TypeScript, i18next, Axios, Redux, ESLint, Prettier

React Native Developer Intern
Expansio Software House

July 2021 - August 2021

- Developing a mobile e-learning platform with React Native and Redux.
- Improving internationalization in the app and revamping all application screens.
- Taking part in dev meetings regarding code base and product.

Technologies: React Native, TypeScript, JavaScript ES6, Redux, ESLint, Prettier

Projects

Vilandy

February 2023 - now

The app is an all-in-one unique Home & Garden shopping platform offering the opportunity to sell and buy used furniture and accessories.

Demo: https://www.vilandy.com/

Technologies: Next.js, React.js, TypeScript, Jest, Styled Components, Redux, RTK Query, Axios, Sentry, ESLint, Prettier

The Labz Event Designer

The app is an all-in-one event website builder for creating interactive, fully customizable virtual events. The app can support various use cases, starting from a simple static website to an advanced video-conferencing platform. My contribution to the project was that I maintained and developed the existing codebase in a team with other developers.

Demo: https://www.thelabz.com/

Technologies: Next.js, React.js, TypeScript, Prisma, PostgreSQL, Storybook, Jest, Socket.io, ESLint, Prettier

Devscard

September 2022 - January 2023

The main objective of the app is to create a comprehensive virtual portfolio in just a few minutes. It's an open-source project created in collaboration with a team of passionate developers. Project tech-stack allowed me to learn and use the newest cutting-edge technologies for creating static web pages.

Demo: https://szymonkin.dev/

Repository: https://github.com/KonradSzwarc/devscard

Technologies: Astro, React.js, TypeScript, Tailwind CSS, Node.js

CodersCamp

August 2021 - October 2021

The goal of the app is to create an all-in-one platform to organize CodersCamp entirely online. CodersCamp is a 6-month web programming course organized by the CodersCrew Association. Our mission is to lead everyone from the first lines of code to start a career as a web developer.

Demo: https://www.coderscamp.edu.pl

Repository: https://github.com/CodersCrew/coderscamp

Technologies: Next.js, React.js, TypeScript, Chakra UI, Vite, Jest, Docusaurus

Education and Certifications

Computer Science

October 2020 - February 2024

Collegium Da Vinci

Engineer's degree. Specialization in mobile and web application development.
